PROFESSIONAL PROFILE

Project Manager with **more than 10 years** leading web and mobile software development projects (Android, iOS, Flutter, Node.js, PHP, .NET) for clients such as **Banco Santander**, **Iberia**, **Toyota**, **Telefónica** and **Novartis**. I manage the full cycle: requirements with the client, planning, leading cross-functional teams, budget and cost control, QA coordination and reporting.

I have led the **integration of AI tools** into client projects, such as the automated video editing platform for WorkCafé by Banco Santander, and I use generative AI every day (Claude, ChatGPT, Gemini) together with workflow automation in n8n and Make. **Certified Scrum Master** and trained in **PMBOK (PMI)**. My years as a sales director give me a business mindset and easy dealings with clients and senior management.

10+ years
as a Project Manager

Up to 8 people
per team: UX/UI, full stack, iOS and Android

Multi-sector
banking, telecom, healthcare, aviation, NGOs

Applied AI
in client and personal projects

Technologies managed
Android · iOS · Flutter · Node.js · PHP · .NET · Raspberry Pi

SELECTED PROJECTS

WorkCafé by Banco Santander · AI-powered automated video editing AI

Project Manager · Team: 1 UX/UI Designer, 2 Full Stack Developers · Jira

- Design and definition of the project from the initial idea.
- Platform automating video generation, editing and preparation from interviews with several AI tools.
- Team leadership, delivery planning, technical and functional coordination and progress tracking.

Banco Santander · Employee management application (.NET)

Project Manager · Team: 1 UX/UI Designer, 1 Full Stack Developer · Jira, Redmine · 6+ months

- Project management: design, definition, development and maintenance of the application.
- Document management and staff leave management.

Fesbal · Food donation management platform

Project Manager · Team: 1 UX/UI Designer, 2 Full Stack Developers · Node.js, PHP, Jira · 1 year

- Project definition from the initial idea, project management and software QA.
- Full donation life cycle, from donor to delivery: users and roles, OCR and digital signature.

Mediterránea Catering · Canteen meal delivery platform

Project Manager · Team: 1 UX/UI, 2 Full Stack, 1 native iOS, 1 native Android · Node.js, PHP, Jira, Redmine, Trello · 3 years

- Feature definition with the client, project management and software QA.
- Management of meal deliveries to canteens, customers and suppliers, with native Android and iOS apps.

Itera Engineering · Electric vehicle battery charging platform

Project Manager · Team: 1 UX/UI, 1 Full Stack, 1 Flutter Developer · Flutter, PHP, Redmine, Raspberry Pi · 2 years

- Feature definition with the client, project management and software QA.
- B2B and B2C platform to request battery charging for electric vehicles: users and roles, alerts and beacons.

OTHER PROJECTS AND CLIENTS

- **Taxi Blau**: fleet management platform with mobile apps and GPS tracking. **+35% production.**
- **Mi Boleto**: mobile apps and web panel for Spanish state lottery games. **3,000+ customers in year one.**
- **Other clients**: Iberia, Toyota, Telefónica Movistar, Novartis, Orange, LaLiga, Correos Express, Cinfa, Pernod Ricard, the Holy See (Vatican), Valencia City Council and Sirveme Online.

PERSONAL PROJECTS WITH AI

- **First Cut** (firstcut.jesusperezpindado.es): my own platform connecting film students with universities and the industry (Supabase, Stripe, Google Stitch, AI).
- **Author of "Entenderse con la inteligencia artificial"**: a beginner's guide to AI for non-technical readers, in Spanish (Amazon KDP).
- **MegaBot**: self-hosted WhatsApp bot on a Raspberry Pi with the Claude API, web panel and Cloudflare Tunnel.
- **CalcAI**: iPhone app in development, a scientific calculator with an AI mode (OpenAI API, Apple Intelligence for handwriting).
